Allowable Subject Matter

1. This office action is in response to the amendment filed on 110/05/04.
2. Claims 1-9 are allowed.
3. The following is a statement of reasons for the indication of allowable subject matter:

Applicants have amended the claims in compliance with the office action dated 07/14/04. The present invention relates to method and apparatus for providing digital filtering utilized at the transmitter and receiver. The method and apparatus include digital Nyquist filter with null inter-symbol interference designed to process physical signal transmitted through a transmission channel. Prior art of record, taken individually or collectively, fails to fairly teach the particular construction of such filtering, as claimed, in independent claims 1, 9 (claims 2-8 depend therefrom). Therefore, claims 1-9 are found to be novel and unobvious over prior art of record.
